### FIRE-FIGHTING MEASURES

As with other textile materials, most nonwoven fabrics will burn in the dry state if brought into contact with excessive heat or flames and will give off smoke and fumes which should not be inhaled.

Thermoplastic materials, including fabrics will melt at high temperatures. The molten material should not be allowed to come into contact with the skin, to which it may adhere and cause localised burns.

It is recommended that advice should be sought from the local Fire Authority on fire fighting equipment and procedures.
